# Maksym Galyliak

---

I'm tech-savvy full-stack web developer with passion for quality software that improves everyday people lives. I got bachelor's degree in Computer Science and currently going through coding boot-camp pursuing the goal to constantly improve and learn latest technologies, as well as obtaining new skills.

Through my experience in sales business and retail, I learned how to be successful self-motivator and work under pressure. As well as how to properly deliver complicated information to people from different backgrounds.

Looking forward to new opportunities where I can utilize my full potential.
